

# Eyad Gamal Abd El Khalea Khamis

## Front-End Developer(React , Next.js)

📍 Cairo, Egypt    ✉ [ieadgamal@gmail.com](mailto:ieadgamal@gmail.com)    ☎ +201500043512    [www.linkedin.com/in/eyadgamal99](https://www.linkedin.com/in/eyadgamal99)

---

### PROFESSIONALS SUMMARY

---

Aspiring Front-end Developer with a strong foundation in modern web development tools. Experienced in using Postman, VS Code, and GitHub to manage and deploy code efficiently. Seeking to leverage technical aptitude and dedication to detail in a Front-end Developer role to enhance website functionality and user experience at a dynamic web development company.

### PROJECTS

---

#### Pink Bunny Store

[PinkBinnyStore](#) • February 2025 - April 2025

- Developed a full e-commerce platform for beauty products using React & Mongoo db.
- Designed a modern, responsive UI compatible with mobile, tablet, and desktop devices.
- Built a clear product catalog with high-quality images and categorized listings.
- Implemented dynamic routing using React Router for smooth navigation.
- Utilized Axios and React Query for efficient data fetching and caching.
- Integrated React Slick and Slick Carousel to showcase products and promotional banners interactively.
- Applied real-time feedback and notifications with React Toastify and React Hot Toast to enhance user experience.
- Improved loading states and user flow using React Loader Spinner for a polished browsing experience.

#### E-Commerce Web App

[Fresh Cart](#) • February 2025 - February 2025

- Developed a full-featured e-commerce application using React.
- Implemented dynamic routing with React Router for seamless navigation.
- Used React Query & Axios for efficient API data fetching and caching.
- Integrated React Slick & Slick Carousel for interactive product sliders.
- Enhanced UI/UX with React Toastify & React Hot Toast for notifications.
- Improved loading experience using React Loader Spinner.

#### GPT-3 UI – AI Landing Page

[GPT-3.APP](#) • June 2025

- Developed a responsive landing page using React, inspired by OpenAI's GPT-3 concept.
- Built with a modern layout and smooth user interactions.
- Used reusable components and clean file structure for scalability.

#### Easybank – Modern Banking Landing Page

[Easybank .app](#) • June 2025

- Designed a responsive and accessible banking website using HTML5, CSS3, and JavaScript.
- Focused on layout consistency and mobile-first design principles.
- Delivered pixel-perfect design based on provided UI mockups.

#### Admin Dashboard – Management Interface

## [AdminDashboard.app](#) • June 2025

- Created a dynamic admin panel with charts, stats, and side navigation using **HTML**, **CSS**, and **JavaScript**.
- Implemented data cards and visual elements to represent system metrics.
- Focused on usability and intuitive layout structure.

## Altamayyoze – Business Landing Page

### [Altamayyoze.app](#) • May 2025

- Developed a modern and responsive business landing page with **HTML**, **CSS**, and basic JavaScript.
- Focused on clean layout, structured content sections, and CTA positioning.
- Emphasized clear service presentation and professional look.

## ROKTC – Space-Themed Landing Page

### [ROKTC.APP](#) • May 2025

- Created a single-page space-themed layout using **HTML** and **CSS**.
- Included animated elements and structured sections for storytelling.
- Optimized for mobile responsiveness and visual impact.

## Gifted Wallet – Crypto Wallet UI

### [GiftedWallet.APP](#) • April 2025

- Designed a modern UI concept for a digital wallet platform using **HTML** and **CSS**.
- Built with a clean layout and consistent theming.
- Focused on UI design representation more than functionality.
